Medicating anxiety in children

Disruptive mood dysregulation disorder – the new pediatric bipolar disorder?

## ADHD Medications – What’s new, what’s old. Stimulants, Non-Stimulants, and some surprises!

The evolution of psychostimulants

## Alzheimer’s medications, treatments, theory and controversy

## What’s Next: Newly Approved Mental Health Medications

# Objectives

- Evaluate the clinical uses of the five major psychotropic medication classes- the antidepressants, mood stabilizers, anti-anxiety agents, antipsychotics and psychostimulants- how they work, and their common side effects.
- Breakdown the potential benefits and risks of using psychotropic medication for a wide array of conditions and patients.
- Explore the wide array of mental health disorders for which medications are frequently prescribed.
- Determine what’s coming next as well as emerging and innovative trends in psychopharmacology.
- Implement effective methods for collaborating with clients, families and prescribers.
- Communicate the ethical and legal issues in discussing medications with clients.
